

NORNS SELECTOR

fast tap of KEY1 (MENU) to get in and out of menu mode.

from here navigate pages with forward/back KEY2/3
and scroll up/down with ENC2.

SELECT > load different script.

it's a file browser.

keep going right until you get to preview text,
which you can scroll for some information
about the script. go right again to load.

PARAMETERS > change script params.

use ENC3 to change param values.

if you SLEEP, turn NORNS back on with a long (3s)
hold of KEY1.
